PROJECTS

Forkify- [Live Demo](#), [Github Repo](#)

This project was put together using WebPack, HTML, CSS and JavaScript to search up different food recipes.

- Utilizes axios to retrieve an API that will get different types of food recipes.
- Ability to save certain recipes even after reloading the page.
- Ability to add and subtract the amount of servings.

Library App- [Live Demo](#), [Github Repo](#)

This project was created using React to allow the user to browse for books and add them to a cart for checkout.

- Has the ability to add books into a shopping cart.
- The cart component also allows editing the contents of the items selected.
- All form related fields are made using reusable components.

Volunteer work

Reality Labs: Highlands Presbyterian Community Church

Installed hardware and configured routers, switches and wireless access points.
