

Gustavo Yepez

Software Developer

Portfolio website | [Github](#) | [linkedin](#) | (352)-226-7808 | gustavoyepe96@gmail.com

EDUCATION

Western Governors University

Bachelor of Science in Software Development

Present

Santa Fe College

A.S Computer Programing and Analysis

December 2022

WORK EXPERIENCE

University Of Florida

Software Developer intern

Gainesville, FL

May 2022 - July 2022

- Applied various skills to evaluate, design, implement and optimize databases and database applications.
- Developed data models and database designs to plan projects.
- Implemented new feature to delete inactive users from database using laravel and sql.

LeadrPro - Contract

Junior Full Stack Developer

Remote

February 2022 - March 2022

- Provided technical expertise for designing, construction and execution of software solutions.
- Maximized use of Events and promises in ES6 and React for application control flow.
- Participated in learning of business, technical and organizational elements with team staff.

PROJECTS

Library App- [Live Demo](#), [Github Repo](#)

This project was created using React to allow the user to browse for books and add them to a cart for checkout.

- Has the ability to add books into a shopping cart.
- The cart component also allows editing the contents of the items selected.
- All form related fields are made using reusable components.

Food Truck Tracker- [Live Demo](#), [Github Repo](#)

Food truck tracker lets you quickly see all of our Operator partners' nearby food trucks that are currently open.

- Users can register / create an account as either an operator or diner by providing at minimum a unique username, a valid email and a password.
- Developed and extended API endpoints for said components.
- Built modular component-based frontends for existing API endpoints.

Volunteer work

Reality Labs: Highlands Presbyterian Community Church

- Constructed a wireless mesh network with 20 WiFi access points to cover the Highlands Community Center campus.
- Becoming a mirror site for certain Linux and BSD distributions
- Running a ProxMox Cluster Management system that allows for the automatic spin-up of VMs of various operating system types.
